## WELCOME TO OUR ARUN TRACTORS

*a farmer's greatest treasure*

### A Tractor Update

Sonalika is an Indian agricultural machinery manufacturer, and it is well-known for producing tractors. As of my last knowledge update in September 2021, Sonalika International Tractors Limited is one of the leading tractor manufacturers in India and has a significant presence in the global tractor market.

Sonalika manufactures a wide range of tractors that cater to various agricultural and farming needs. Their tractors come in different power ranges, from small utility tractors to large, high-horsepower models.

Sonalika has been focused on innovation in tractor technology and features. They have introduced various models with advanced features like digital instrument clusters, ergonomic designs, and fuel-efficient engines.

Some Sonalika tractor models come with an enclosed cabin for operator comfort and safety, while others feature Roll-Over Protection Structures (ROPS) for safety in open-field operations.

### New Team Member Alert

#### THIS IS OUR NEW TRACTOR!

Sonalika tractors are equipped with a range of engine options, including different power outputs and fuel types. Engine power can vary from small utility tractors to high-horsepower models. Sonalika tractors are available in both 2-wheel drive (2WD) and 4-wheel drive (4WD) configurations to suit different agricultural and farming needs.
